ROBERTET  
— GROUPE —

## CSR commitment of the products offered on the site

### Environment

Reduce CO2 emissions as much as possible with optimised logistics.

Quality control, product storage and preparation of orders for shipment are entrusted to the IME (Institut Médico-Educatif) Valfleurs in Grasse (French Red Cross).

Favour suppliers who give non-conforming parts and unsold items to associations or reuse defective markings.

Favour suppliers with closed-loop water circuits.

Choose suppliers who apply the 3Rs regulation: Reuse, Recycle, Reduce.

Apply an existing eco-score label to a product based on defined criteria rather than self-declared labels specific to suppliers.

### The Human

Only work with suppliers who guarantee good working conditions, respect equal opportunities, parity, non-discrimination and the health of their employees, have, for example, signed the Global Compact charter, are SEDEX members, etc.

Prohibit the use of child labour throughout the value chain.

### Product

All the products listed respect our charter.

Favour recycled, upcycled, reused and reemployed materials.

Choose easily recyclable single-material plastics such as PET, PP, PE, not PVC or PS, and recycled plastics such as rPET, rPP, etc.

No harmful chemical substances in our products, which must all comply with REACH regulations.

No mineral or UV inks, our markings are made with vegetable ink and water to limit the energy consumption linked to drying and facilitate their recycling.

Favour standard and reusable formats to avoid duplicating production tools and simplify product recycling.

Select certified and labelled products.

## Respecting our commitments \*

The SA 8000 regulation advocates decent working conditions.

An initiative led by companies that are committed to improving working conditions in their international supply chains.

ISO 14000 brings together several standards that enable an effective environmental management system.

A label that allows the implementation of concrete actions leading to a reduction of the impact of the activity on the environment.

The Forest Stewardship Council is an international NGO that promotes ecological, social and economic forest management.

Prevented Ocean Plastic is recycled plastic collected from coastal areas at risk of ocean plastic pollution.

GRS is a standard that establishes criteria for certification of recycled content, chain of custody, and restrictions on chemical composition.

Label with several technical standards that guarantee the absence of toxic products for the body and the environment.

GOTS is an organic certification that allows the label "organic textile" to be displayed.

World Trade Association for open and sustainable trade.
